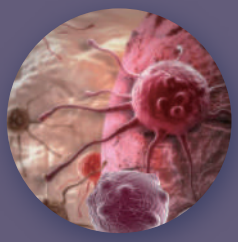
MCE Master of Small Molecules

MEGA SALE

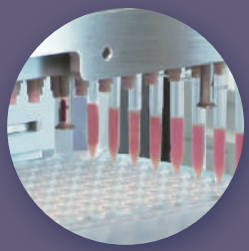
Inhibitors & Agonists

15,000+ specific inhibitors and agonists



Applications in different disease areas

Targeting 375 key proteins in 20 signaling pathways



Compound Screening Libraries

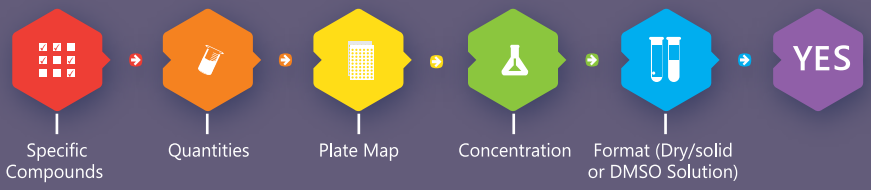
50+ screening libraries optimized for disease mechanism revealing & drug repurposing

A collection of stored chemicals optimized for a specific research purpose, usually used in **high-throughput screening, drug discovery** and **new indication research.** MedChemExpress (MCE) compound libraries consist of **over 4000** small molecules with validated biological and pharmacological activities.

- **Bioactive Compound Library** (3811 bioactive compounds)
- **FDA-Approved Drug Library** (1416 FDA-approved drugs)
- **Kinase Inhibitor Library** (650 kinase inhibitors)
- **Epigenetics Compound Library** (232 epigenetics compounds)
- **Clinical Compound Library** (539 clinical compounds)
- **Anti-Cancer Compound Library** (1418 anti-cancer compounds)
- **Anti-Infection Compound Library** (423 anti-infection compounds)
- **GPCR/G Protein Compound Library** (566 GPCR/G protein compounds)

Customize Your Library

MCE offers customized compound libraries based on your specific needs. You can select compounds, format (powder/liquid), size and plate map depending on your requirements.



Offer is valid to customers who purchase at least 2 inhibitor cocktails (any pack size, mixed or same type). Lowest product price shall apply to the 3rd FREE inhibitor cocktails

PROMO CODE: MCECOVID19

EXTENDED UNTIL 31 AUGUST 2020
